OK since we can leverage on existing wells, that will help our investigation and no need at this time to drill additional wells.

Work per se has not started. All of the wells are existing wells in the area between Ana Maria and Club de Leones

details

Hi Denise,

I'm not sure about the rationale behind the spacing of these proposed wells, but I'm sure they've already started field work. Some are existing wells, but is this the case for all of them?
